

Paper Bowls & Lids

Our Paper Bowls & Lids are a versatile system of sustainable packaging covering your core dine-in and take-out needs. Our Bowls function well for hot entrees, salads, soups, appetizers and featured menu items. Our high clarity lids are made from recyclable PP which allows your team and customers to easily identify the contents. We also provide a superior stacking and venting design so your creations arrive in perfect condition!

Get rid of the heavy black plastic and use sustainable paper. We can custom print too, so your branding message can make it home along with the food!
